¿Sabías que el caballito de mar es monógamo? ...se dice que al morir uno de ellos, la pareja se deja morir al poco tiempo.

Did you know that the male is responsible for incubating the fertilized eggs in a bag that has been placed in front of the queue, giving it the appearance of pregnant until they are born the offspring?

Did you know that the seahorses are monogamous? It is said that the death of one of them, the couple leaves die shortly after.

Did you know that the male is responsible for incubating the fertilized eggs in a bag that has been placed in front of the queue, giving it the appearance of pregnant until they are born the offspring?
